## **DETAILED ACTION**

### ***Response to Amendment***

This communication is responsive to Amendment A, filed 07/10/2004.

Claim 2 is pending in this application. In the Amendment A, Claim 2 was amended. Furthermore, Claim 1 was canceled. This action is made Final.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Objections***

Claim 2 is objected to because of the following informalities:

The phrase "computer softer" is unclear. The Examiner believes the Applicant meant to say "computer software".

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 2 is rejected under 35 U.S.C. 102(e) as being anticipated by Foreman et al. (US 6628303).

In regards to claim 2, Foreman teaches a computer software device to be executed by a computer for displaying a video in real-time, the computer software

comprising instructions for: receiving user instructions to apply a transition between a first video clip and a second video clip (Figure 10, Element 192); retrieving a frame from the first video clip (Figure 17E); retrieving a frame from the second video clip (Figure 17E); applying the transition effect to the frame from the first video clip and the second frame from the second video clip to compose a new frame (Figure 17E); displaying the new frame to an observer in real-time prior to processing a subsequent frame (Figure 10, Element 172); and repeating the instructions above for the subsequent frame (Figure 10, Element 192, *The user can add more than one effect and between the different effects, the user can preview the current work before moving on to the next effect*).

### ***Response to Arguments***

Applicant's arguments with respect to claim 2 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
